

Professional Profile

Software Engineering student with a strong foundation in software development, web technologies, and Artificial Intelligence. Possesses strong logical thinking, excellent self-learning abilities, and hands-on experience developing projects using JavaScript, React, Node.js, and machine learning models. Highly motivated to join a development role and continue growing professionally in the software industry.

Technical Skills

Programming Languages: JavaScript, Python, Java, C#, C, C++, HTML, CSS.
Technologies: React, Node.js, .NET Core, Web API, Entity Framework, AWS, OOP.
Databases: SQL Server, MongoDB.
Tools: GitHub, Bitbucket.
Operating Systems: Windows, Linux.

Projects

Customer Inquiry Management System | Java

- * Developed the system using Agile methodologies, including system analysis, characterization, and detailed workflow planning.
- * Managed tasks and sub-tasks using Git and Bitbucket in a collaborative environment.
- * Focused on system-wide architecture, clean code practices, and robust handling of edge cases.

Inventory Management System (3-Tier Architecture) | C# .NET

- * Developed a comprehensive management system using .NET 8 and Windows Forms.
- * Implemented 3-Tier Architecture to ensure strict separation of concerns
- * Utilized Design Patterns such as Singleton and Factory to optimize system structure.
- * Developed core functionalities including advanced search, filtering, and data updates using LINQ and XML files.

Loan Eligibility Prediction System | Machine Learning

- * Developed a classification model to predict loan eligibility based on financial and demographic parameters.
 - * Performed Data Pre-processing, including data cleaning, feature encoding, and scaling to maximize model accuracy.
 - * Trained and implemented multiple algorithms, including Logistic Regression, SVM, and kNN.
 - * Evaluated model performance using key metrics: Accuracy, Precision, and Recall.
-

Education

2025–2026: Software Engineering Studies (MAHAT)

Practical Software Engineering Diploma (In progress).
Curriculum in collaboration with Kama-Tech – Extra Code.
Professional English enrichment course.

2021–2023: High School Education

Full Matriculation Certificate (Bagrut) specializing in ICT (Information and Communication Technology) ,5 units of English.

Languages

Hebrew: Native speaker | **English:** Advanced
